**ASP.NET MVC 4 | Microsoft Docs**  
You can create applications using either Visual Basic or Visual C# as the programming language. Select Visual C# on the left and then select ASP.NET MVC 4 Web Application. Name your project "MvcMovie" and then click OK. In the New ASP.NET MVC 4 Project dialog box, select Internet Application. Leave Razor as the default view engine. Click OK. Visual Studio used a default template for the ASP.NET MVC project you just created, so you have a working application right now without doing anything!

**Intro to ASP.NET MVC 4 | Microsoft Docs**  
ASP.NET MVC 4 is a framework for developing highly testable and maintainable Web applications that follow the Model-View-Controller (MVC) pattern. The framework encourages you to maintain a clear separation of concerns— views for UI, controllers for handling user input, and models for domain logic. ASP.NET MVC applications are particularly suited for unit testing and using test-driven development (TDD) techniques.
